goSmart® ProcessManager

Designing document creation processes as effectively as possible and achieving savings is a special focus of every company. Having a legally-compliant, trackable workflow system minimises security risks and increases transparency.

Do you want to…

implement complex document creation processes easily?

manage your processes easily, quickly and efficiently?

integrate different user groups into the document creation process?

manage users, roles and rights?

Then goSmart® ProcessManager is the right solution for you.

The advantages at a glance:

➕ High-performance, server-based process management (workflow management) with electronic forwarding or approval to avoid manual workflows and format inconsistencies

➕ Modern and intuitive user interface (HTML)

➕ Efficient process management saves time and money

➕ Service-oriented interfaces for fast integration into custom applications and IT infrastructures

➕ Central template management based on user roles or business transaction

➕ Integration of individual correspondence into automated output channels

➕ User, role and rights management to ensure comprehensive security (sensitive business transactions)
