goSmart® TestCenter

Companies nowadays deal with an ever-increasing number of documents in different formats, versions and variants. Changes to documents or new software releases are especially critical. In such cases, it is essential to quickly identify what effects the changes to the documents will have, and it must be ensured that any new software release delivers the same results as its predecessor.

Do you want to…

compare documents automatically?

exercise quality control over your correspondence?

present manual and automated test runs in detail?

test multiple output channels simultaneously?

Then goSmart®TestCenter is the right solution for you.

The advantages at a glance:

- Detailed presentation of manual and automated test runs
- Elimination of laborious troubleshooting processes saves time and money
- Clear document management
- Clear presentation of test results (test cockpit)
- Interface for integrating third-party software for comparison purposes
- Simultaneous testing of multiple output channels
- The document does not enter the next stage (e.g. production) until test results are positive
